INTRODUCTION

This *Bibliography* is intended, as its name implies, to bring CLIC's original *Bibliography* up to date as of January 1986.[1] This year, a major change has been implemented in the preparation and format of the text, and minor editorial changes have been made to offer what is hoped to be a more useful and accessible research tool.

More important are the substantive editorial changes this year necessitated by two factors: first, the continuing explosion of publication in the field of computers and law, and second, the regular appearance of other bibliographies which thoroughly canvass so much of the available American material. As a result, we have decided to include verified references according to the following editorial priorities and guidelines:

(1) to be comprehensive with respect to Canadian materials in all subject areas;

(2) to increase coverage of materials relating to substantive computer law issues;

(3) to reduce coverage of material relating to automated law office management by (a) not including citation of works readily accessible through other bibliographies, and (b) including citations to major articles and texts but without lengthy annotation; and

(4) to retain present coverage in all other subject areas, but to selectively annotate where the material is particularly lengthy, where the title is not descriptive, or where the content is especially interesting.

CLIC is planning to make the database available to users in diskette form for retrieval on their own microcomputers. If you have an IBM-PC or compatible machine, please write for more details.

The editor would like to thank Valli Bos and Heather Murphy for their diligent efforts in tracking down the materials and writing the annotations. The typographical accuracy and appearance of the text owes a great deal to the contributions of Michelle Lemieux and Peggy Brûlé, and to them the Council is heavily indebted. Despite all this invaluable assistance, the editor remains solely responsible for any errors which may have crept into the text. Readers' comments will be most welcome.

Martin Felsky, Ph.D., LL.B.
Director, Computers and the Law

SUBJECT HEADINGS 9

SUBJECT LISTING 11

CONSOLIDATED LIST OF REFERENCES 29

LIST OF TITLES AND AUTHORS 87

LIST OF JOURNALS CONSULTED. 103

HOW TO USE THIS BIBLIOGRAPHY

- *If you know the subject matter*

1. Check the **LIST OF SUBJECT HEADINGS** to determine those applicable. Under the appropriate headings in the subject list you will find references alphabetized by author's name, accompanied by a short form of the title. (References without authors are alphabetized by title name, and appear before all authored references.)

2. Use the author's name (or title, where there is no author) to locate the full bibliographical reference and annotation in the **CONSOLIDATED LIST OF REFERENCES**.

- *If you know the author's name*

Go directly to the **CONSOLIDATED LIST OF REFERENCES**

- *If you know the title only*

Check in the alphabetical **LIST OF TITLES AND AUTHORS**. Use the author's name to find the full citation in the **CONSOLIDATED LIST OF REFERENCES**.

Rutgers Computer & Technology Law Journal, Rutgers Law School [1979-] 7 200 pp. Published semi-annually. Previousy entitled *Rutgers Journal of Computers, Technology and the Law.* A law journal comprised of articles, essays, comments and other items of interest in the area of technological advancement.

"Sentencing by Computer: An Experiment," [1983] 16 *Law/Technology* 36-37. Reveals the availability of a report concerned with the possibility of making sentencing decisions by computer. The report is published as part of the Complex Series of the Norwegian Research Centre for Computers and Law. The report includes the sentencing model, the program and the file used in the research. It is intended that this information be used by the reader to implement the program on a computer and experience sentencing by computer.

"Software Distribution Agreements: A Summary," [August 1985] 2 *Canadian Computer Law Reporter* 191-198.

Software Protection: A Journal on the Legal, Technical and Practical Aspects of Protecting Computer Software, Law & Technology Press Los Angeles, CA [1982-] 1-. A newsletter published eight times a year on developments in computer software protection from an international perspective.

"Special Focus: Police Technology," [April 1984] 51 *Police Chief* 33-58. A series of articles focused on law enforcement and technology. Includes articles on the computer revolution, law enforcement information systems, computer-assisted management of police reporting systems, computerized fingerprint systems and use of computers in police training.

SPECS: The Canadian Directory for Law Office Automation, Canadian Law Information Council Ottawa [1982] 233. Details the following information: 1) Lists Canadian companies which provide software, hardware, service bureau or consulting services for law offices. 2) Details the complexities of law office automation. 3) Provides an evaluation guide and purchase checklist of automated services.

State Computer Tax Report, 1982, Bigelow and Saltzberg Woburn, PA [1982].

"Symposium on Law Library Automation," [1984-1985] 77 *Law Library Journal* 3-156. Deals with a number of issues of concern to law librarians contemplating the implementation of automated systems in law libraries. Topics include administration of, and planning for, library automation, systems in place in academic law libraries, implications of increased reliance on full text databases in law libraries and effects of technology on the librarian profession.

The Computer Law Annual 1985, Harcourt Brace Jovanovich, Inc San Diego, CA [1985]. Articles taken from *Computer Lawyer.*

The Computer Revolution (Special Issue), [May-June 1983] 9 *Legal Economics* 1-92. Special issue of the journal, 'Legal Economics' composed of a collection of articles addressing the issue of office automation.

The Computer User's Legal Reporter, The Computer Law Group, Inc Westport, CT [1984-].

The Electronic Vault: Computer Piracy and Privacy, Yankee Group Boston, MA [1984] 122 p.

"The Law is Still not Ready to Cope with Computer Fraud," [February 1983] 15 *Canadian Datasystems* 44. Staff Sergeant Brian Watt of the RCMP Commercial Crime Section addresses the Canadian Payroll Association at a meeting in Toronto. At issue, is computer fraud and the need for specific Canadian legislation to deal with this problem.

The Lawyer's PC: A Newsletter for Lawyers Using Personal Computers, RPW Publishing Corporation Lexington, SC [1983-] 1-. Semimonthly publication on personal computers in law office management. Lawyers provide reviews of software or examples of personal computer use in their law firms. Regular sections list new software and hardware products and briefly annotate new publications.

"The New Uniform Payments Code," [1983] 9 *Rutgers Computer & Technology Law Journal* 315-402. Presentation of a series of articles related to the proposed Uniform Payments Code and the effect it will have on electronic funds transfer.

The Scott Report, Law & Technology Press Manhatten Beach, CA [1981-] 16 pp. A monthly research report on the law of computers, telecommunications and information.

The United States Patents Quarterly, Associated Industry Publications Washington, DC [1929-] 1-.

Trade Secret Law Reporter, Law & Technology Press Manhatten Beach, CA [1985-] 1-.

"Transborder Data Flows: Access to the International On-line Data-base Market: A Technical Paper," United Nations New York, NY [1983] 140 p. A study done by the United Nations Centre on Transnational Corporations (UNCTC) on the international online database industry. It describes the industry, delineates the dimensions of its market, describes the role of transnational corporations in that market, examines the potential relevance of online databases for developing countries, and analyzes ways in which developing countries could strengthen their information resources.

"Transborder Data Flows: Proceedings of an OECD Conference Held December 1983," North-Holland Amsterdam [1985] 503 p.

"VDTs and Technological Changes in the Office Environment," [May 1984] 1 *Computer Law* 33-37.

"What is Transborder Data Flow's Economic Impact," [March 1984] 1 *Computer Law* 23-24.

"WIPO: Legal Protection of Computer Software," [Nov-Dec 1983] 17 *Journal of World Trade Law* 537-545. Deals with the meeting of a Committee of experts under the auspices of the World Intellectual Property Organization (WIPO) who meet in Geneva in June 1983 to consider appropriate measures for the protection of computer software.

"Word Processing in the Courts. Jointly Sponsored by the National Center for State Courts and the Bureau of Justice Statistics," National Center for State Courts Williamsburg, VA [1984] 59 p.

Adam, GF, "Contractual, Financial, and Tax Issues in Major Procurements," [Winter 1984] 5 *Computer/Law Journal* 465-523.

Aguilar, J Arnold, "Proprietary Protection of Computer Software in the United States and Brazil," [Summer 1984] 19 *Texas International Law Journal* 643-673.

Alexander, Christine, "Preserving High Technology Secrets: National Security Controls on University Research and Teaching," [1983] 15 *Law and Policy in International Business* 173-240.

Allen, Lynne B, "The Patentability of Computer Programs: Merrill Lynch's Patent for a Financial Services System," [1983-1984] 59 *Indiana Law Journal* 633-657.

Altman, James S, "Copyright Protection of Computer Software," [Winter 1985] 5 *Computer Law/Journal* 413-432.

Anawalt, Howard C, "Computer Law Symposium," [1983] 23 *Santa Clara Law Review* 979-1198. This issue of the Santa Clara Law Review is devoted to the subject of computer law with special attention given to the problems of intellectual property and computers. Other areas addressed include professional malpractice and the computer specialist, litigation support systems and high technology and the conflict between the interests of the employer and employees.

Andrews, David, "Legal Information Retrieval: Have They Got It Right?," [December 1983] 69 *American Bar Association Journal* 1865-1867. Describes how the suppliers of electronic publications need to work more closely with the legal profession and produce what the profession needs when it needs it and at an affordable price.

Andrews, David, "The Legal Challenge Posed by New Technologies," [Fall 1983] 24 *Jurimetrics Journal* 43-57. Addresses the legal challenge arising from the special nature of the computer coupled with the inability of the law to cope with it. Specific topics include: privacy, computerized crime, transborder data flow, artificial intelligence, computer-assisted legal information retrieval (CALR), and document authentication.

Anstey, Kevin T and McDonald, Patrica A, course co-ordinators, "1985 Computers and Law Institute: Materials Prepared for a Continuing Legal Education Seminar Held in Vancouver, BC on March 10-14, 1985," CLES of BC Vancouver, BC [1985].

Beer, Barbro, "Legal Aspects of Automatic Trade Data Interchange," [Jan-Feb 1984] 7 *Transnational Data Report on Information Politics & Regulation* 52-57.

Bellam, Leonard, "Building a Legal Framework for Trade in Computer Services," [1984] 1 *Computer Law* 69-72.

Bender, David, *Computer Law,* Matthew Bender New York, NY [1984-] 2v looseleaf.

Bennett, Guy, "Selected Bibliographical Material on Computer-Assisted Legal Analysis," [Spring 1984] 24 *Jurimetrics Journal* 283-290. Consolidation of published bibliographies and selected bibliographic references for use by researchers interested in the application of computer technology to the practice of law.

Bennett, Guy M, "The Role of the Computer in the Law Firm or Corporate Legal Department," [March-April 1984] 10 *Legal Economics* 53-59,77-78. The legal profession has been relatively slow in applying computer technology to its problems. This article is directed at illustrating how law offices can successfully apply computer technology to their business and gain significant competitive advantages over those which will not or cannot.

Bequai, August, *How to Prevent Computer Crime: A Guide for Managers,* Wiley New York, NY [1983] 308 p.

Best, Reba A and Picquet, D Cheryn, compilers, *Computer Crime, Abuse, Liability, and Security: A Comprehensive Bibliography, 1970-1985,* McFarland & Company Incorporated Jefferson, NC [1985] 155 p.

Bigelow, Robert P, editor, *Computers and the Law: An Introductory Handbook,* 3rd Commerce Clearing House Chicago, IL [1981] 343 p. A collection of articles providing a basic introduction to the field of computer law. It contains sections on computer technology; computer use in law offices and in government; regulation; computer contracts; legal problems such as software protection, privacy and tax; and applications in various industries. A glossary and bibliography are included.

Bing, Jon, *Handbook of Legal Information Retrieval,* Elsevier Science Publishing Company New York, NY [1984] 580 pp. Provides theoretical perspective of the legal decision and communication processes. Explores concept of 'legal information retrieval system' with particular emphasis on text retrieval. Discusses role of international organizations in development of computerized legal information systems. Includes international survey of legal information systems which covers over 25 countries.

Brown, RA, "Computer-Produced Evidence in Australia," [1984] 8 *University of Tasmania Law Review* 46-61.

Brown, RA, "Crime and Computers," [April 1983] 7 *Criminal Law Journal* 68-89. Examines the need for new Australian legislation to deal with computer-related crimes. Proposes an overhaul to existing laws before any new offences are created. Provides a classification system for computer-related acts that might be considered criminal in nature.

Brown, Richard L, "Copyright and Computer Databases: The Case of the Bibliographic Utility," [1985] 11 *Rutgers Computer & Technology Law Journal* 17-49. Increasing number of libraries participate in nationwide computerized bibliographic networks whereby as each library completes a catalogue record, the record is entered into a central database. Thus, it becomes immediately available to all participants. The article examines the copyrightability of the bibliographic databases produced and utilized by library networks.

Buchanan, Jack R, "A Database Management System for the Federal Courts," [March 1984] 9 *ACM Transactions on Database Systems* 72-88. Describes a database programming facility developed at the Federal Judicial Centre (FJC) in Washington, DC. The FJC serves as the development agency of the federal judiciary. The mandate of the facility is to develop large scale computing systems to provide automated support for court management.

Burkert, Herbert, "Information Law Problems for the Eighties," [Aug-Sept 1984] 7 *Transnational Data Report on Information Politics & Regulation* 331-336.

Burnett, Jack, "A Common Market in Traded Computer Services," [Sept-Oct 1984] 1 *Computer Law* 72-74.

Burson, Scott F, "Report from the Electronic Trenches: An Update on Computer-Assisted Legal Research," [Summer 1984] 4 *Legal Reference Services Quarterly* 3-26. Examines recent improvements made to the two American computer-assisted legal research systems (CALR), Lexis and Westlaw. Identifies areas which might be improved with respect to the two systems.

Buss, Martin DJ, "Common Sense and Computer Security," [March-April 1984] 84 *Harvard Business Review* 112-121.

Cameron, Judith M, "Applications of Computer Technology to Law (1979-1982): A Selected Bibliography," [1983] 16 *Law/Technology* 1-69. Represents the first supplement to the Canadian Law Information Council's bibliography entitled 'Computers and the Law'. The supplement covers the period from 1979 to 1982.

Campbell, Colin, editor, *Data Processing and the Law,* Sweet & Maxwell London [1984] 264 p. Collection of papers from the Colloquium on Data Processing and the Law in Leicester, in September 1982, by experts in computer law from Europe, North America and Australia. Major topics include the nature and uses of legal information, the adaptation of modern technology for legal purposes, and the legal response to major problems created by technology such as data protection, privacy and copyright.

Campbell, Duncan, "Computers Do Not Help Crime Detection," [June 29, 1984] 107 *New Statesman* 4. Discusses two internal home office reports which conclude that it is impossible to determine the effectiveness of police intelligence computer systems in fighting crimes in Great Britain.

Canada. Parl. House of Commons. Sub-committee on Computer Crime, "Minutes of Proceedings and Evidence of the Sub-committee on Computer Crime of the Standing Committee on Justice and Legal Affairs," Queen's Printer Ottawa [1983] 18 nos.

Chesser, James, "Semiconductor Chip Protection: Changing Roles for Copyright and Competition," [March 1985] 71 *Virginia Law Review* 249-295.

Chesser, James P, "Copyright Protection for Integrated Circuits: Reevaluating Old Ideas About New Competitive Processes," [1984] 22 *University of Western Ontario Law Review* 201-233.

Childress, Steven Allan, "Warning Label for Lexis: The Hazards of Computer-Assisted Research to the Legal Profession," [1982] 13 *Lincoln Law Review* 91. Warns the legal profession against sole reliance on computer-assisted research (CALR) systems, in particular the Lexis system, to satisfy its legal information needs. Suggests that the ultimate benefits from CALR may be slow in arriving and limited. In addition, computer research presents special problems for the researcher which should be recognized. Proper research techniques involve both manual and automated techniques.

Ciampi, Costantino, et al., *THES/BID: A Computer-Based Thesaurus of Terminology in Computers and the Law,* Le Monnier Firenze [1982] 575 p. A thesaurus of terms used internationally that deal with both the use of computers in law and computer law. It contains a KWOC index, a structured alphabetical list, a hierarchical list, and a classification table. It also provides a geographical index and two acronym lists.

Cira, John E, "Computer Abuse: The Silicon Pry Bar," [September 1983] 50 *Police Chief* 46-47.

Coco, Al, "Full-Text vs Full-text plus Editorial Additions: Comparative Retrieval Effectiveness of the Lexis and Westlaw Systems," [Summer 1984] 4 *Legal Reference Services Quarterly* 27-37. Deals with computer-assisted legal research (CALR). Outlines some of the problems and processes involved with using full-text retrieval and presents positive results of a comparative test of retrieval effectiveness run on Westlaw and Lexis.

Computer Law Institute (4th : 1983 : New York, NY), "Fourth Annual Computer Law Institute. Ronald L Johnston, chairman. Sponsored by Legal Times/Harcourt Brace Jovanovich and University of Southern California Law Center," Law & Business New York, NY [1983] 846 p.

deBessonet, Carey, "An Automated Intelligent System Based on a Model of a Legal System," [1983] 10 *Rutgers Computer & Technology Law Journal* 31-58. Describes the progress made in a research project sponsored by the Centre of Civil Law Studies located at Louisana State University Law Centre, Baton Rouge. One goal is to develop drafting techniques capable of producing statutory texts which can be processed intelligently by computers. The system developed utilizes artificial intelligence to generate intelligent responses to input.

Delahaie, Henri, "Les nouveaux moyens de paiement ont-ils besoin d'un cadre juridique spécifique: l'expérience française," [1983] 24 *Les Cahiers de droit* 279-304. Examines the need for new legislation to regulate the 'electronic money' payment system, a product of the new technology. Discusses how French legislation (France) is addressing the same issue.

DeLuca, Samuel M, "Telelawyering," [July 1984] 70 *American Bar Association Journal* 48-51. Discusses the art of using telecommunications to deliver better, more efficient and timely client services.

Denning, Peter J, "Computer Crime and Privacy: A National Dilemma," [April 1984] 27 *Communications of the ACM* 312-313. Introduces testimony made by members of the

Association for Computing Machinery at hearings before congressional committees on the problems of computer crime and information systems security.

Desjardins-Siciliano, Yves, "Data Protection Legislation in Canada," [March 1984] 1 *Canadian Computer Law Reporter* 99-101.

Dumont, Monique, "La fraude informatique: une nouvelle forme de criminalité," [1981-82] 49 *Assurances* 293-306.

Edge, CT, *Small Computer Systems for Solicitors,* Gower Publishing Co. Aldershot, Hants, England [1983] 133 p.

Edwards, John D, "Lexis and Westlaw Instruction in the Law School: University of Oklahoma," [Summer 1983] 76 *Law Library Journal* 605-631. Explains how the University of Oklahoma Law Library Staff teaches first-year law students to use the two major publicly available computer-assisted legal research systems (CALR): Lexis and Westlaw.

Eischen, Bernadette, "Apple Loses Australian Decision," [February 1984] 1 *Canadian Computer Law Reporter* 75-76. Discusses a recent decision of the Federal Court of Australia in the case of Apple Computer Inc et al. (applicants) vs Computer Edge Pty et al. (respondents). This decision deviates from the current Canadian jurisprudence relating to copyright in computer software in that the Court decided that none of the programs were literary works within the meaning of Australia's Copyright Act. Considers possible implications of decision in Canada and Australia.

Eischen, Bernadette, "Australian Copyright Act Amended to Protect Computer Software," [November 1984] 2 *Canadian Computer Law Reporter* 9-10.

Eischen, Bernadette, "Courts Again Confirm Copyright in Software in Canada," [September 1984] 1 *Canadian Computer Law Reporter* 217-222.

Eischen, Bernadette, "Revisions to the Copyright Act," [December 1983] 1 *Canadian Computer Law Reporter* 25-27. Discusses possible amendments to the Copyright Act being considered by the Department of Consumer & Corporate Affairs with the aim of protecting computer software.

Eischen, Bernadette, "The Revision of Copyright Law: A New Look," [November 1985] 3 *Canadian Computer Law Reporter* 1-5. Discusses recommendations found in the October 1985 Report (A Charter of Rights for Creators - On the Revision of Copyright) of the Sub-committee of the Standing Committee on Communications and Culture. In general, the recommendations in the Report are substantially more favourable to the protection of computer software than those found in the White Paper.

Eischen, Bernadette, "The Semiconductor Chip Protection Act: An Update," [August 1985] 2 *Canadian Computer Law Reporter* 185-188.

Eischen, Bernadette, "The Use of Trade Secrets to Protect Computer Technology," [May 1984] 1 *Canadian Computer Law Reporter* 141.

Emerson, JE, "Litigation Management Support System," [Sept-Oct 1983] 9 *Legal Economics* 49-52.

Englander, Bradford Frost, "Copyrightability of Computer Operating Systems," [Fall 1984] 41 *Washington and Lee Law Review* 1361-1385.

Eskew, Joy L, "The Copyright Dilemma Facing Texas Educators as They Implement Computer Literacy into the Curriculum," [July 1985] 22 *Houston Law Review* 1011-1044.

Fairgrieve, David, "R v Turner (Case Comment)," [November 1985] 3 *Canadian Computer Law Reporter* 9-13. A case comment regarding a prosecution whereby the mischief section (section 387) of the Criminal Code is applied to a situation of electronic manipulation of data stored on computer tapes. The Court of Appeal's disposition of this case supports the view that the Criminal Code applied to computer crime prior to the amendments of Bill C-18.

Fakes, Arthur, "Mainframe Computer Conversions: Buyer and Seller Beware," [Spring 1985] 5 *Computer/Law Journal* 469-491.

Feiler, William S, "Computer Aided Litigation Support in Patent Litigation," [1984] 25 *Idea* 177-189.

Feldheim, David A, "Computer Backup and Disaster Recovery Agreements," [Spring 1984] 24 *Jurimetrics Journal* 210-217.

Felsky, Martin, *Computer-Assisted Legal Research: A Guide for Canadian Law Students 1985-1986 Supplement,* Canadian Law Information Council Ottawa [1985] 9 pp. Supplement outlines improvements to the retrieval capabilities of QL Systems software (Canada's largest computer-assisted legal research system). Outlines new databases available through QL Systems as of December 9, 1985. Also provides information related to two new Quebec services: 1) Société québécoise d'information juridique (SOQUIJ) and 2) IST - Informathèque Inc.

Felsky, Martin, "Evaluating Legal Information Systems," [1985] 18 *Law/Technology* 23-55. A survey of major issues relating to online legal information systems, this article reviews Jon Bing's *Handbook of Legal Information Retrieval* (1984).

Fenwick, William A, chairman, "Computer Litigation, 1984: Resolving Computer Related Disputes and Protecting Proprietary Rights," Practising Law Institute New York, NY [1984] 1008 p.

Fenwick, William A, chairman, "Computer Litigation, 1985: Trial Tactics and Techniques," Practising Law Institute New York, NY [1985] 623 p.

Ferris, Keiren, "Ways You Can Help Protect Your Corporate Information," [May-June 1983] 7 *CIPS Review* 6-8.

Finlay, John L, "Another Alternative: Personation," [February 1984] 1 *Canadian Computer Law Reporter* 70-72. Explores the possibility of applying the personation provision in the Criminal Code (section 361) to computer-related crime. The theory of a prosecution based upon personation would be that the accused impersonated the individual who had been assigned the password when the accused logged onto the system using the other individual's identification and password.

Finlay, John L, "Computer Fraud: Must You Know Your Victim?," [January 1984] 1 *Canadian Computer Law Reporter* 51-55.

Finlay, John L, "Problems with the 'Property' Concept in Computer Crime Legislation," [July 1984] 1 *Canadian Computer Law Reporter* 182-189.

Finlay, John L, "Proposed Amendments to the Criminal Code to Include Provisions for Computer Crimes," [November 1983] 1 *Canadian Computer Law Reporter* 1-8.

Finlay, John L, "The Admissibility of Computer Records in Criminal Proceedings," [December 1983] 1 *Canadian Computer Law Reporter* 33-36. Examines the existing Canada Evidence Act with respect to the admissibility of documentary evidence including computer records. Through a legal analysis, identifies two major problems with the admissibility of computer records owned or in the custody or control of a financial institution or a business that are sought to be introduced in criminal proceedings by way of statutory exception to the hearsay rule found in the Canada Evidence Act.

Finlay, John L, "Theft and Fraud by Use of a Computer: Problems with Territoriality," [April 1985] 2 *Canadian Computer Law Reporter* 116-120.

Fischer, Mark A, "Entertainment/Computer Law: Converging Industries, Converging Law," [September 1984] 20 *Trial* 42-44. Claims that in the next two decades the fields of entertainment law, literary property law, computer law and communications law will become increasingly linked. Attorneys will have to develop a combined knowledge of these fields in order to provide proper legal advice to their clients.

Fisk, George, "First Copyright Case on Computer Software in Canada," [November 1983] 1 *Canadian Computer Law Reporter* 14-15.

Fisk, George, "New Developments in Software Copyright," [December 1983] 1 *Canadian Computer Law Reporter* 27-28.

Fisk, George E, "Apple v Macintosh (Case Comment)," [February 1985] 2 *Canadian Computer Law Reporter* 85. Case comment on a recent Federal Court Decision in which Apple Computer Inc failed to obtain an interlocutory injunction restraining various distributors and retailers from selling computers containing chips alleged to be copies of its products.

Fisk, George E, "Protecting Computer Programs by Patent: Decisions of the Patent Appeal Board After Schlumberger," [September 1985] 2 *Canadian Computer Law Reporter* 201-205.

Flach, Julianne M, "Index and Sixteenth Selected Bibliography on Computers and the Law (October 1981 through March 1983)," [1983] 9 *Rutgers Computer & Technology Law Journal* 407-446.

Fombrun, Charles J, "Focus: Institutional Adaptation to Technological Change," [Spring 1983] 18 *The Columbia Journal of World Business* 1-92. Special issue of the Columbia Journal of World Business presents a selection of articles dealing with the nature of technological changes in the area of communications and its impact on the institutions of today's society.

Forst, Brian, "Overburdened Courts and Underutilized Information Technology: A Modern Prescription for a Chronic Disorder," [June-July 1984] 68 *Judicature* 30-36. Advocates the use of information processing technology to increase the efficiency of today's courtrooms and to provide information that can support even-handed and effective judicial decisions. Discusses the features of a particular software package called Docketrac (a member of the Promis Legal Software) which performs a variety of management information functions. Concludes that court officials must soon make use of this new technology.

Fortin, Jean, "L'ordinateur et le droit: quel avenir?," [Décembre 1983] 3 *Revue Canadienne du Droit D'Auteur* 23-27. Examines Canadian and American legislation and jurisprudence as it relates to protection of software rights.

Foster, Anne, "Automated Legal Information Retrieval Systems and Other Related Services," [December 1984] 2 *Canadian Computer Law Reporter* 17-26. Provides basic information concerning computer-assisted legal research systems (CALR) and how to use them. Discusses other services available to the law office equipped with

communicating terminals.

Foster, David L, "Customizing Your Computer," [May 1984] 69 *American Bar Association Journal* 77-80. Illustrates how many law office micro computer systems can be enhanced by the many 'add-ons' available. This is known as the 'building block' approach to law office automation.

Foster, M Anne, "Demand Grows for Legal Info Retrieval Systems," [May-June 1983] 7 *CIPS Review* 24-25. Discusses how Canadian law can be organized into three groups: case law, legislative materials and secondary sources. Examines the nature of legal information and how computer-assisted legal research systems (CALR) are presently dealing with this data. Speculates what might occur should any of the three CALR publishers (QL Systems, Westlaw and Lexis) withdraw from providing the services that support the retrieval systems.

Foster, M Anne, "Legal Databases," [December 1985] 3 *Canadian Computer Law Reporter* 26-31. Discusses the current state-of-the-art of large commercial databases and identifies the standards to be considered by database builders.

Francella, Kevin, "Multiple Controls Combat Computer Crime," [July 1983] 21 *Data Management* 21.

Franson, Robert T, "Computer Applications in Law: The IBM-UBC Cooperative Project in Law and Computers," [December 1985] 3 *Canadian Computer Law Reporter* 31-39. The University of British Columbia and IBM Canada have entered into a cooperative project to employ the application of computer technology to the legal profession. The article explores the reasons why the two parties entered into such an agreement and reveals what they hope the project will accomplish.

Fraser, B, "Software Protection Strategies," [June 1984] 1 *Computer Law* 41-43.

Fraser, Brian, "Keeping Software a Trade Secret," [June 1984] 1 *Computer Law* 43-46.

Fraser, Brian, "Source-Code Escrow Agreements," [July 1984] 1 *Computer Law* 55-56.

Freed, Roy N, "Legal Interests Related to Software Programs," [Summer 1985] 25 *Jurimetrics Journal* 347-376. Analyzes the adequacy and suitability of existing law for protecting intellectual property rights related to software programs and databases. Suggests the effectiveness of the law that bars unauthorized copying is undermined by undetectable reprographic means and that suppliers should concentrate on developing anti-reprographic technology or adopt distribution methods that will discourage the unauthorized use of software and databases.

Freed, Roy N, "Security Interests in the Computer Age: Practical Advice for the Secured Lender," [July-August 1984] 101 *The Banking Law Journal* 404-429.

Freed, Roy N, "The Admissibility of Computer Records in Evidence," [January 1983] 5 *Information Age* 7-10. Discussion of the United States rules on the admissibility of computer records as evidence.

Freedman, Frances, "Copyright Goes Computer; A Case Law Survey of Recent Developments in Canada," [1985] 45 *La Revue du Barreau* 316-325.

Fuchigami, Harry H and Ruttinger, George, co-chairmen, "Government Procurement of Computers and Telecommunications Equipment," Law & Business New York, NY [1983] 442 p.

Gagnon, André, "Mon Radio Shack et moi," [Été 1985] 1 *Le Monde Juridique* 30-31.

Galin, Joseph J, *Computers and the Law: A Selected Bibliography,* Vance Bibliographies Monticello, IL [1985] 13 p.

Galler, Elaine B, "Contracting Problems in the Computer Industry: Should Specialists Be Subjected to Malpractice Liability," [October 1983] 50 *Insurance Counsel Journal* 574-598.

Galvin, FJ Jr, "Computer-Aided Research for the Law Firm," [August 1983] 27 *Res Gestae* 78-82.

Gavrilov, EP, "New Technology and Copyright Law," [Fall 1983] 22 *Soviet Law and Government* 33-44. Examines the adequacy of existing copyright law in the Soviet Union in relation to the new technology. Of special interest, addresses the question of computers and copyright law.

Geraedts, Henry, "The PRC (People's Republic of China)'s Policy of Technology Acquisition: Some Aspects," [1983] 18 *Cooperation & Conflict: Nordic Journal of International Politics* 115-128.

Gevirtzman, Robert, "Litigation Support Activities," [November 1984] 35 *Journal of Systems Management* 5-6. Superficially examines two case histories of legal proceedings brought against computer vendors by dissatisfied customers and identifies occasions when system professionals, working with attorneys, may provide support in legal actions to either the customers or the hardware/software vendors.

Giard, Yves, "Pour une meilleure défensive contre la fraude informatique," [1984-1985] 52 *Assurances* 160-167.

Giller, Richard C, "Roms, Rams and Copyright: The Copyrightability of Computer Chips," [1984] 14 *Southwestern University Law Review* 685-744.

Glynn, Elizabeth A, "Computer Abuse: The Emerging Crime and the Need for Legislation," [1983-1984] 12 *Fordham Urban Law Journal* 73-101. Examines the rapid increase in computer crime and the existing and proposed state computer crime statutes. Concludes that traditional federal and state criminal statutes are ineffective with respect to computer crimes.

Goldberg, Morton David, chairman, "Computer Software, 1984: Protection and Marketing," Practising Law Institute New York, NY [1984] 2 v.

Goldberg, Morton David, chairman, "Software Protection and Marketing: Computer Programs and Data Bases, Video Games and Motion Pictures," Practising Law Institute New York, NY [1983] 2 v.

Goldblatt, Margaret A, "Legal Looseleaf Services: A Computer-Based Approach," [Summer 1982] 75 *Law Library Journal* 420-426.

Goldstein, Bruce, "Electronic Fraud: The Crime of the Future," [June 1983] 50 *Police Chief* 50-53.

Goneau, M, "Bit Crimes," [December 1984] 26 *Executive* 13. Discusses a few statements made about computer crime by Standard Research Institute's, Donn Parker, author of four books on computer crime.

Gonzales, Laurence, *Computers for Lawyers,* Ballantine Books New York, NY [1984] 139 p.

Gonzalez, Pamela, "Addressing a Computer Crime Legislation: Progress and Regress," [Summer 1983] 4 *Computer/Law Journal* 195-206. Reveals deficiencies in existing legislation relating to computer crimes and provides an analytical framework to evaluate computer abuse legislation. Examines briefly the new Florida Computer Crimes Act which creates two new classification of computer offences: an offence against intellectual property and an offence against the authorized computer user.

Good, Phillip I, *A Critic's Guide to Software for the IBM PC and PC Compatible Computers: Computers for Professionals in Business, Agriculture, Law and Health,* Chilton Book Company Radnor, PA [1983] 284 p.

Goodman, Jeffrey S, "The Policy Implications of Granting Patent Protection to Computer Software: An Economic Analysis," [January 1984] 37 *Vanderbilt Law Review* 147-181. Analyzes the propriety of granting patent law protection to computer software by examining the problem from economic, legal, public and technological policy perspectives.

Gordon, Marcy J, "Derivative Work Protection for Computer Software Conversions," [October 1985] 7 *Communications and the Law* 3-24.

Gordon, Mark L, "Emerging Issues in Computer Procurements," [Summer 1985] 6 *Computer/Law Journal* 119-142.

Goss, David J, "Law: The Ultimate High-Tech Battleground," [July 1983] 16 *Mini/Micro Systems* 231". Examines the failure of the justice system to deal effectively with most high technology cases. Complex legal and technical issues are tending to result in lengthy trials and dubious decisions. Discusses new alternatives to the traditional judges and juries such as arbitration, 'mini-trials' and court-appointed technical advisers.

Gotlieb, A, "Transborder Data Flows: Legal Aspects," [March 1984] 1 *Computer Law* 17-20.

Graham, John M, "Fair Administration of the Freedom of Information Act After the Computer Revolution," [Summer 1984] 5 *Computer/Law Journal* 51-76.

Graham, Robert L, "The Legal Protection of Computer Software," [May 1984] 27 *Communications of the ACM* 422-426.

Grainger, Brian, "Hard Times and Automation: Should Computers Assist Judges in Sentencing Decisions," [April 1984] 26 *Canadian Journal of Criminology* 231-233.

Examines the reasons for the judiciary system to make use of computer-assisted decision-making tools.

Grasset, Christopher J, "Functional Specifications: The Core of a Computer-System Contract," [February 1984] 1 *Computer Law* 13-16.

Grasset, Christopher J, "What Is a Computer-System Contract?," [January 1984] 1 *Computer Law* 6-8.

Gravel, Christian, "Les banques de données de SOQUIJ: un outil privilégié pour les praticiens du droit," [Été 1985] 1 *Le Monde Juridique* 16-18.

Graziano, Sue Ganski, "Computerized Stop Payment Orders under the UCC: Reasonable Care or Customer Beware?," [November 1985] 90 *Commercial Law Journal* 550-562.

Green, Colin, "Planning the Conversion to a Computerized Recording System," [December 1984] 2 *Canadian Computer Law Reporter* 37-42.

Greene, Richard, "Beep Beep - Call a Lawyer," [April 11, 1983] 131 *Forbes* 51. Discusses the need for companies leasing software from software suppliers to be fully appraised of the liabilities incurred so as to avoid later contract disputes.

Griffin, Patricia, "Copyright Law and Computer Software: The Third and Ninth Circuits Take Another Bite of the Apple," [Fall 1984] 49 *Albany Law Review* 170-200.

Grosse, Robert, "Le micro-ordinateur: un outil rentable pour votre cabinet," [Été 1985] 1 *Le Monde Juridique* 11-13.

Grossman, Garry S, "Computers and Legal Reasoning," [January 1983] 69 *American Bar Association Journal* 66-70. Outlines the benefits that will be realized when computer systems now in development begin to perform or assist in the process of legal reasoning. Describes several computer programs that represent experimental attempts to simulate legal reasoning.

Haeck, Louis, "Report on the Second World Conference on Transborder Data Flow Policies," [July 1984] 1 *Canadian Computer Law Reporter* 193-194.

Hagelshaw, R Lee, "The Computer User's Legal Guide," Chilton Book Company Radnor, PA [1985] 232 p.

Haines, BW, "No Copyright in Computer Software?," [February 24, 1984] 128 *The Solicitor's Journal* 126-127.

Hale, T, "Information Retrieval," [March 4, 1983] 133 *New Law Journal* 210,212.

Hall, David A, "Strict Products Liability and Computer Software: Caveat Vendor," [Fall 1983] 4 *Computer/Law Journal* 373-400.

Hall, Linda E, "Index and Seventeenth Selected Bibliography on Computers and the Law (April 1983 through November 1984)," [1985] 11 *Rutgers Computer & Technology Law Journal* 195-281.

Halligan, Joseph, *Softwhere: Legal*, Moore Data Management Services Minneapolis, MN [1984].

Hamilton, WA, "Computer-Induced Improvements in the Administration of Justice," [Summer 1983] 4 *Computer/Law Journal* 55-76. Deals specifically with the computer-based case tracking system known as PROMIS (acronym for Prosecutor's Management Information System). Provides an historical background to the PROMIS system and discusses improvements experienced in the administration of Justice in the United States which can be directly attributed to the PROMIS system.

Hammond, RG, "Theft of Information," [April 1984] 100 *The Law Quarterly Review* 252-264.

Hancock, Paul, "Lawyers and the New Technology," [June 21, 1985] 135 *New Law Journal* 617-620. First article of a series on computer technology for practising lawyers. It provides a basic introduction to computers and their applications in a law office.

Hancock, W A, editor, *Data Processing Agreements*, Business Laws, Inc Chesterfield, OH [1983-] looseleaf.

Hanson, Daniel J, "Easing Plaintiff's Burden of Proving Negligence for Computer Malfunction," [October 1983] 69 *Iowa Law Review* 241-262.

Hardy, I Trotter Jr, "Six Copyright Theories for the Protection of Computer Object Programs," [1984] 26 *Arizona Law Review* 845-870.

Hardy, I Trotter Jr, "Transborder Data Flow: an Overview and Critique of Recent Concerns," [1983] 9 *Rutgers Computer & Technology Law Journal* 247-264.

Harper, Timothy, "Computer Evidence Is Coming," [November 1984] 70 *American Bar Association Journal* 80-84.

Harrington, William G, "A Brief History of Computer-Assisted Legal Research," [1984-85] 77 *Law Library Journal* 543-556. Traces the development of computer-assisted legal research (CALR) which spans a period of twenty years. Deals specifically with the Horty Project (University of Pittsburgh in early 1960's), Ohio Bar Automated Research Project known as OBAR (Ohio State Bar Association in late 1960's), the Lexis System and the Westlaw System. Summarizes the future of computer-assisted legal research.

Harris, Charles Edison, "Complex Contract Issues in the Acquisition of Hardware and Software," [Summer 1983] 4 *Computer/Law Journal* 77-100.

Harris, John R, "A Market-Oriented Approach to the Use of Trade Secret or Copyright Protection (or both?) for Software," [Winter 1985] 25 *Jurimetrics Journal* 147-167.

Harris, John R, "Apple Computer, Inc v Franklin Computer Corp - Does a Rom a Computer Program Make?," [Spring 1984] 24 *Jurimetrics Journal* 248-253.

Harris, Neil H, "Capital Cost Allowance," [April 1984] 1 *Computer Law* 26-30. This

article reviews the allowable capital cost allowance deductions for hardware and software acquired by purchase or lease.

Harris, Neil H, "Hardware and Software: Income Tax Issues," [April 1984] 1 *Computer Law* 25-26.

Harris, Neil H, "Income Tax Incentive Provisions," [April 1984] 1 *Computer Law* 30-31.

Harris, Neil H, "Withholding Tax on Software Payments to Nonresidents," [April 1984] 1 *Computer Law* 31-32.

Harris, Thorne D, *The Legal Guide to Computer Software Protection: A Practical Handbook on Copyrights, Trademarks, Publishing, and Trade Secrets,* Prentice-Hall Englewood Cliffs, NJ [1985] 221 p.

Hartnick, Alan J, "A Primer on the Interface of Trade Secrets and Copyright on Software Protection," [November 1984] 6 *Communications and the Law* 3-9.

Haugsness, CA, "Copyright and Computer Software," [July-August 1985] 24 *AEDS Monitor* 13-14. Provides advice to teachers and administrators regarding the application of copyright law to computer software. Discusses implications of the 1980 amendment to the American Copyright Act of 1976. The amendment specifically addresses computer software protection and computer software rights.

Hayden, Peter R, "Effect of the Foreign Investment Review Act on the Computer Industry," [January 1984] 1 *Canadian Computer Law Reporter* 57-62.

Hazen, Margaret M, "Simulation of Legal Analysis and Instruction on the Computer," [1983-1984] 59 *Indiana Law Journal* 195-222. Focuses on the current optimal use of computers in legal analysis training and takes the position that computer based exercises can supplement all aspects of the law school curriculum. Addresses the topics of computer assisted instruction (CAI), microcomputers, and instructional design as they interrelate in legal education.

Heintz, Bruce D and Bugbee, Nancy Markham, editors, "LOCATE: A Directory of Law Office Computer Software," American Bar Association Chicago, IL [1984] 181 p.

Helein, CH, "Software Lock-in and Antitrust Tying Arrangements: The Lessons of Data General [Digidyne Corp v Data General Corp, 743 F2d 1336]," [Winter 1985] 5 *Computer/Law Journal* 329-345.

Hellquist, George A, "Computer Controls in Manufacturing: How Do They Affect Product Liability Litigation?," [November 1985] 21 *Trial* 39-46.

Henderson, William A, "Accounting Software: Regulation and Reality," [December 1984] 2 *Canadian Computer Law Reporter* 31-37.

Hernandez, JIJ, "The Law and Modern Technology," [1984] 17 *Law/Technology* 17-43. Reveals the way in which computers are being employed in Spain in relation to the preparation of legislation and jurisprudence and the administration of justice. Highlights certain legal issues associated with the increasing use of computers.

Heron, PT, "Computerized Counsel," [1983] 7 *Canadian Lawyer* 14-21. Three lawyers describe how introducing technology to their respective law offices has improved their productivity and working environment.

Hertz, A, "Copyright in Computer Programs," [1984] 1 *Computer Law* 49-55.

Joseph, Jonathan, "Computer Contract Challenges," [Winter 1985] 5 *Computer Law/Journal* 379-391.

Karasik, Myron S, "The Computerization of an 11-Lawyer Firm," [September 1983] 68 *American Bar Association Journal* 1236-1240. The consultant hired to automate an 11-lawyer firm describes the various stages of the office automation project and provides advice to others contemplating the same.

Kauffman, S Blair, "Automated Legislative Information Systems: A New Tool for Legal Research?," [Spring 1983] 76 *Law Library Journal* 233-263. Reviews the development of automated legislative information systems in the United States, particularly statutory search and retrieval systems and bill status systems. A comparison is made of government and commercial systems. Proposes solutions to the access and

dissemination issues.

Kaufman, Benjamin, S, "Copyrighting Object Code: Applying Old Legal Tools to New Technologies," [Fall 1983] 4 *Computer/Law Journal* 421-440.

Kavass, Igor I, "Computerized Legal Data Bases: An International Survey," [June & August 1983] 11 *International Journal of Legal Information* 115-129. Discusses how the law profession's reliance on legal information has lead to the emergence of the legal publishing industry, law libraries and computer-assisted legal research systems (CALR). Provides information about CALR systems available in the following jurisdictions: United States, Europe, United Kingdom, Canada and Australia. Comparison made of the two American Systems: Lexis & Westlaw. Prediction regarding CALR impact on legal research.

Kawashima, Kiyoshiand, "Legal Protection of Software in Japan," [January 1983] 5 *Information Age* 23-31.

Kenfield, DL, "Remedies in Software Copyright," [Summer 1985] 6 *Computer/Law Journal* 1-33.

Kenny, JJ, "The Data Protection Act 1984," [March 1985] 1 *Computer Bulletin* 10-12.

Keplinger, Michael S, chairman; and Brooks, Daniel T, editor, "Computer Software Protection: A Pragmatic Approach: Proceedings of the Program, October 15-16, 1981, Dupont Plaza Hotel, Washington, DC," Computer Law Association Springfield, VA [1982] 213 p.

Kingston, Judith EA, "Software Acquisitions: Product Definitions and Delivery," [January 1984] 1 *Canadian Computer Law Reporter* 42-46.

Kingston, Judith EA, "Software Acquisitions: The Uncertainty of Liquidated Damages Provisions," [April 1984] 1 *Canadian Computer Law Reporter* 134-138.

Kingston, Judith EA, "The Protection of Software Subject to Security Agreements," [February 1984] 1 *Canadian Computer Law Reporter* 65-69.

Kingston, Judith EA, "The Rights of a Software Licensee When the Licensor Ceases to Exist," [March 1984] 1 *Canadian Computer Law Reporter* 109-114. The rights of a licensee to use software will probably be affected if the licensor ceases to exist. The writer examines how such rights pertaining to trade secrets, patents and copyright law will be altered by a corporate licensor's cessation of business either through amalgamation, liquidation, dissolution or bankruptcy.

Kinsock, John E, *Legal Databases Online: LEXIS and WESTLAW,* Libraries Unlimited Littleton, CO [1985] 104 p. A manual of online searching on LEXIS and WESTLAW describing the hardware, the system, and search strategy, as well as giving sample problems. Cost-effective search techniques are emphasized. An analysis of the economic aspects of online legal research is also presented.

Kirby, MD, "Computer Crime and Law Reform in Australia," [October 1983] 5 *Information Age* 241-247.

Kirby, MD, "Information Technology Legislation in Australia," [July 1983] 5 *Information Age* 172-180.

Klineman, Robert D Jr, "Computer Add-ons for Law Firms," [October 1983] 69 *American Bar Association Journal* 1482-1490.

Kling, Allan J, *Computer-Assisted Legal Research: A Guide for Canadian Law Students,* Canadian Law Information Council Ottawa [1984] 103 pp. Provides explanations, examples and practice exercises intended to acquaint the reader with the concepts and strategies of computer-assisted legal research (CALR). The guide is particularly directed to Canada's largest CALR service, QL Systems Ltd. Also furnishes information about other available automated legal information retrieval systems.

Koblovsky, B, "Telecommunications for the Law Office," [1983] 7 *Canadian Lawyer* 28-32.

Kostenbauder, Daniel, "Taxation of Computer Software (Part One)," [Summer 1985] 25 *Jurimetrics Journal* 387-425. Report prepared for the Computer Law Division, Committee on Taxation of Computer Systems and Products. Deals with the taxation of computer software at the federal and state level, and in the context of domestic and foreign transactions, including customs issues.

Kostenbauder, Daniel, "Taxation of Computer Software (Part Two)," [Fall 1985] 26 *Jurimetrics Journal* 77-111. Report prepared for the Computer Law Division, Committee on Taxation of Computer Systems and Products. Deals with the taxation of computer software at the federal and state level, and in the context of domestic and foreign transactions, including customs issues.

Kraemer, Sam, "Disclosure and the Computer Programmer," [Spring 1985] 5 *Computer/Law Journal* 557-578.

Kratz, Martin Paul John, "R v Tannas (Case Comment)," [September 1985] 2 *Canadian Computer Law Reporter* 205-209. Discusses an unreported Alberta Queen's Bench case in which the theft provisions of section 283 of the Criminal Code are applied to the situation of piracy of computer programs.

Kratz, Martin Paul John, "Trade Secret Protection of Computer Programs: Part One," [September 1984] 1 *Canadian Computer Law Reporter* 219-222.

Kratz, Martin Paul John, "Trade Secret Protection of Computer Programs: Part Two,"

[October 1984] 1 *Canadian Computer Law Reporter* 231-244.

Kratz, Martin PJ, "Patent Protection of Computer Programs," [February 1985] 2 *Canadian Computer Law Reporter* 72-79.

Kreindler, Jerry, "Canavest House v Lett (Case Comment)," [1985] 2 *Canadian Computer Law Reporter* 95-97. Examines a recent Supreme Court of Ontario decision which confirms that Canadian courts will grant protection to computer software under Canada's Copyright Act. Marks the first attempt by Canadian courts to deal with the problem of employee rights in computer programs developed during the course of employment.

Kreindler, Jerry, "Consumers' Association of Canada v Hamilton-Avnet Int (Canada) Ltd (1983), December 6 (Ontario High Court) Unreported (Case Comment)," [May 1985] 2 *Canadian Computer Law Reporter* 138-139. Consumers' Association of Canada v Hamilton-Avnet is a good example of what might befall an inexperienced buyer who attempts to purchase a computer system without obtaining the consulting services needed to make the system work effectively.

Kusserow, Richard P, "The Government Needs Computer Matching to Root out Waste and Fraud," [Sept-Oct 1984] 23 *AEDS Monitor* 12-14.

Kutten, LJ, "Computer Buyer's Protection Guide: How to Protect Your Rights in the Microcomputer Marketplace," Prentice-Hall Englewood Cliffs, NJ [1984] 142 p.

Kyer, C Ian, "Computer Records as Courtroom Evidence," [Sept-Oct 1984] 1 *Computer Law* 76-80. This article is Part II of a study on computer records as courtroom evidence. Focuses on computer-generated records in civil proceedings in Alberta, New Brunswick and Newfoundland.

Kyer, C Ian, "Computer Records as Courtroom Evidence," [August 1984] 1 *Computer Law* 57-60. This article is Part I of a study on computer records as courtroom evidence. Examines computerized bank and business records as courtroom evidence in civil and criminal proceedings. Focuses on the Canada Evidence Act and on the evidence laws of Prince Edward Island, Nova Scotia, Ontario, Manitoba, Saskatchewan and British Columbia.

Kyer, C Ian, "The U.K. Data Protection Act: A Model for Canada?," [October 1985] 2 *Canadian Computer Law Reporter* 225-230.

L'Heureux, Nicole, "Les effets de la technologie et la protection des droits des consommateurs dans le paiement bancaire," [1983] 24 *Les Cahiers de droit* 254-278. Computer and communications technology has greatly affected the banking business, and the relationship between the financial institutions and their clients. The author examines the need for legislation to clearly establish the rights, liabilities and responsibilities of all parties involved and to insure greater consumer protection.

Lang, AG, "Computerized Land Title and Land Information," [December 1984] 10 *Monash University Law Review* 196-220.

Lanoue, Susan, "Computer Software and Strict Products Liability," [March 1983] 20 *San Diego Law Review* 439-456.

Laurence, Hugh G, "Software Escrow Agreements: Part One," [August 1984] 1 *Canadian Computer Law Reporter* 203-207.

Laurence, Hugh G, "Software Escrow Agreements: Part Two," [September 1984] 1 *Canadian Computer Law Reporter* 209-216.

Laurence, Hugh G, "Software Protection Through Confidentiality Agreements," [May 1984] 1 *Canadian Computer Law Reporter* 147-151.

Lautsch, JC, "Computers, Communications and the Wealth of Nations: Some Theoretical and Policy Considerations About an Information Economy," [Summer 1983] 4 *Computer/Law Journal* 101-132. Explores the connection between the efficiency of processing information and the creation of wealth. Deals with the impact of computerization (including robotization) on Society.

Lautsch, John C, *American Standard Handbook of Software Business Law,* Reston Publishing Company Reston, VA [1985] 417 p.

Lauzanne, Marie-Claude, "Trademark Protection for Computer Programs," [nd] 2 *Computer Law* 1-3, 7-8.

Lavey, Warren G, "Antitrust Issues Critical to Structuring Vertical Channels of Distribution for Computer Businesses," [Winter 1984] 5 *Computer/Law Journal* 525-550.

Le May, Denis, "Vers un contrôle bibliographique pour les lois du Québec," [1983] 24 *Les Cahiers de droit* 305-321. Describes two methods to build an informative and easily retrievable legislative database: 1) International Standard Bibliographic Description (ISBD) be applied to legislative texts; 2) methods and standards of the International Standardization Organization (ISO) be followed.

Learmonth, Pat, "Transborder Data Flow and the Canadian Bank Act," [February 1984] 1 *Canadian Computer Law Reporter* 73-75.

Lechter, Michael A, "Protecting Software and Firmware Developments," [August 1983] 16 *Computer* 73-82.

Lemmon, Virginia T, "A Selected Bibliography on Technology and Trade," [1984] 10 *Rutgers Computer & Technology Law Journal* 341-363. Bibliography includes material published from January 1, 1979 to June 1, 1984. Materials are arranged according to the four following headings: Antidumping and Countervailing Duties, Copyright, Patent and Trademark, East-West Trade and Technology and International Trade.

Lemmon, Virginia T, "Electronic Funds Transfer Bibliography-Update," [1983] 9 *Rutgers Computer & Technology Law Journal* 403-406. Bibliographic update for 1981-82 dealing with the subject of electronic funds transfer.

Lentz, L James, "Contracting for Performance in the Procurement of Custom Computer Software," [Spring 1983] 13 *Golden Gate University Law Review* 461-474.

Lerner, Eric J, "Sleuthing by Computer," [July 1983] 20 *IEEE Spectrum* 44-49. Reveals how two computer systems of the Georgia Bureau of Investigation, an agency of the state government, are used to analyze physical evidence and to organize evidence.

Levary, RR, "Some Aspects of Potential Disclosure of Confidential Computerized Legal Material," [Summer 1983] 4 *Computer/Law Journal* 159-169. Identifies the hazards of legal and illegal disclosure of information contained in an attorney's computer system. Discusses the precautions that attorneys should take to protect themselves from computer disclosure.

Levenberg, Opher, "Copyright Law Protection of Computer Software in Canada," [1984] 1 *Canadian Intellectual Property Review* 69-87.

Levy, Charlotte L, *Computer-Assisted Litigation Support: an Annotated Bibliography,* CompuBibs Brooklyn, NY [1984] 31 p.

Light, Terry W, "Take Your Word Processor to Lunch," [July 1983] 19 *Trial* 22-29. In play-like format, a dialogue is carried on between the office word processor and an attorney of the same office. The purpose of this article is to examine the word processor's potential use in comparison to its actual use.

Lipson, Ashley S, "Lawyer's Short Course in Basic Computer Language," [Winter 1984] 24 *Jurimetrics Journal* 154-163.

Llewelyn, David, "Copyright in Computer Software: A Reply," [May 25, 1984] 128 *The Solicitor's Journal* 358-360.

Lockwood, BB, "'Electronic Shock': The Impact of Computer Technology on the Practice of Law," [October 1983] 7 *Dalhousie Law Journal* 743-761. Discusses the technological changes brought on by the present 'information revolution'. Emphasizes the implications for legal practitioners and the implications relevant to the law. Concludes that it is difficult to perceive whether the 'electronic shock' brought on by the computer and the information revolution will be stimulating or disruptive to our society.

Loevinger, Lee, "Science, Technology and Law in Modern Society," [Fall 1985] 26 *Jurimetrics Journal* 1-20. Discusses the broad impact of science and technology on the area of law. Alternatively, looks at the role played by the law on science and technology. Dispells the view held by some in today's society that science, technology, law or politics represent the 'quick fix' to today's problems.

Loewen, WH, "Legislation, Stiff Penalties Provide the Only Real Solution," [May-June 1985] 9 *CIPS Review* 10-11. Claims that only law-makers and the legal profession have enough clout to guarantee privacy of personal data and that self-regulation will fail for reasons outlined.

Luedtke, Peter, *Computers for Law Offices,* Harcourt Brace Jovanovich San Diego, CA [1984] looseleaf.

Luitwieler, Nancy A. et al., editors and compilers, *SPECS: The Canadian Directory for Law Office Automation,* Canadian Law Information Council Ottawa [1982] 233 p. A directory for law firms contemplating automation, listing vendor companies and their services for law offices. It contains an alphabetical list of companies, company profiles, a list of hardware and software vendors and their products, a list of service bureaux that provide data processing services, a list of consultants in law office

automation, and a glossary.

Lyons, Norman R, *Understanding Computer Crime,* Alfred Publishing Co. Inc Sherman Oaks, CA [1984] 48 p.

Macaulay, Susan J, "Causes of Action in Computer Litigation: Special Problems for the Small or First Time User," [Winter 1983] 14 *Loyola University of Chicago Law Journal* 327-357. Reviews brief history of computer-related litigation and the development of the causes of action available to the aggrieved computer user. Examines current state of the law and problems faced by first time users. Discusses future trends in computer litigation and proposes an alternative approach to the causes of action presently available.

MacFarlane, Gavin, "Criminal Trials and the Technological Revolution," [April 8, 1983] 133 *New Law Journal* 327-329. Discussion of methods by which the traditional British criminal trial process could be modified to improve access to the large amounts of documentary evidence made available by computer technology.

MacGrady, Glenn J, "Protection of Computer Software - An Update and Practical Synthesis," [July 1983] 20 *Houston Law Review* 1033-1082.

MacIntosh, Robert M, "Myths, Sensation and Computer Crime," [October 1983] 90 *Canadian Banker* 6-8. Speech of Robert M MacIntosh, President of the Canadian Banker's Association, at a recent meeting of the Canadian Association of Chiefs of Police, held in Calgary. Addresses the issues of computer crime and victim's rights. Claims that the extent of computer crimes is greatly exaggerated in the minds of the public, fostered by sensational and often inaccurate stories in the media. Rejoices in the new emphasis on victims' rights.

Mandell, Steven L, *Computers, Data Processing and the Law,* West Publishing Co. St. Paul, MN [1984] 233 p. College edition, covering computer contracts, computer crime, software protection, privacy, and the legal effects of acquiring a computer on an organization.

Mandell, Steven L, *Computers, Data Processing, and the Law: Text and Cases,* West Publishing Co. St. Paul, MN [1984] 1083 p. Outlines computer law in the US for both lawyers and computer professionals. Topics covered include computer contracts, software protection, computer crime, privacy, the legal effects of acquiring a computer on an organization, computer records as evidence, and tax problems. The text is supplemented by a collection of relevant cases.

Mann, J Fraser, "Copyright and Computer Programs in Canada," [March 1984] 1 *Canadian Computer Law Reporter* 105-109.

Mann, J Fraser, "Copyright Law and Computer Programs: A Review of Recent Developments," [February 1985] 2 *Canadian Computer Law Reporter* 79-85.

Marcellino, JJ, "Expert Witnesses in Software Copyright Infringement Actions," [Summer 1985] 6 *Computer/Law Journal* 35-54.

Markey, Christian E III, "State and Federal Taxation of Computer Software: A Functional Approach," [Spring 1984] 4 *Computer/Law Journal* 737-770.

Marks, Herbert E, chairman, "Computer Telecommunications: Business Opportunities in the New Regulatory/Legal Environment," Law & Business/HBJ New York, NY [1982] 167 p.

Martin, C, "Litigation Support Using dBase III," [1985] 4 *Advocate's Society Journal* 39-41.

Martin, Jody, "Challenges of Going Computer," [March 1983] 69 *American Bar Association Journal* 316-319.

Marz, Gary T, "Routinizing the Discovery of Secrets: Computers as Informants," [March-April 1984] 27 *American Behavioral Scientist* 423-452.

Mason, Mary Ann, *An Introduction to Using Computers in the Law,* West Publishing Co. St. Paul, MN [1984] 223 p. An outline of computer applications in law offices. It explains computer technology and discusses computerized litigation support systems, word processing, case management, financial management, and computer-assisted legal research (CALR). A glossary and selected bibliography are included.

Matthews, RC, "Protection of Rights of Individuals in the EEC in Relation to Automatic Processing of Personal Data," [October 1984] 12 *International Business Lawyer* 410-418.

Mayo, Ken, "Fingering Data Thieves," [November 1985] 4 *Business Computer Systems* 11-12.

McCarty, L Thorne, "Intelligent Legal Information Systems: Problems and Prospects," [1983] 9 *Rutgers Computer & Technology Law Journal* 265-294. Argues that the most critical task in the development of an intelligent legal information system, either for document retrieval or for legal analysis and planning, is the construction of a deep conceptual model of the relevant legal domain. The conceptual model which serves as a foundation for a document retrieval system could also be used for a consultation (expert advice) system.

McClung, Christina J; Guerrière, John A and McClung, Kenneth A, *Microcomputers for Legal Professionals,* Wiley New York, NY [1984] 141 p.

McDonald, Anne L, *Communicating with Legal Databases: Terms and Abbreviations for the Le;;al Researcher,* Neal-Schuman Pubs., Inc New York, NY [1986] 350 p.

McGee, Robert, "Computer Software and the Investment Tax Credit," [Winter 1985] 5 *Computer/Law Journal* 347-362.

McGee, Robert W, "Computer Software and the Research Credit," [Winter 1985] 5 *Computer Law/Journal* 363-378.

McGee, Robert W, "Sales, Use and Property Taxation of Computer Software," [May

1985] 8 *Hamline Law Review* 307-342.

McGonagle, JJ Jr, "Electronic Law Library: The Expanding Role of Computerized Research (Non-Legal Databases)," [September 1983] 19 *Trial* 40, 42, 44, 45. Distinguishes between the two types of non-legal computerized databases of use to the legal profession, bibliographic and interactive. Provides information as to who will perform the research on these databases, what one would hope to find and search strategy.

McGrew, Thomas J, "Computers as a Tool for Bank Merger Analysis," [April 1984] 101 *The Banking Law Journal* 232-245.

McIntosch, David A, "CIPS Plays an Active Role in Helping to Plug Legal Holes," [May-June 1983] 7 *CIPS Review* 10-11. Discusses the role played by the Canadian Information Processing Society (CIPS) in assisting the federal Department of Justice in re-evaluating the issues of theft and fraud (specifically in Parts IX and X of the Criminal Code as related to computer fraud). CIPS organized and conducted a national consultation on computer crime in March 1983. The aim was to provide the Department of Justice with input from the information processing industry.

McIntyre, J, "Personal Computers and Software for Your Law Office," [January 1983] 44 *The Alabama Lawyer* 40-44.

McIntyre, Jill H, "Computerized Legal Research," [1984] 42 *Advocate* 151-155. Provides suggestions as to what problems are conducive to computer searching on QL Systems, Canada's only English language computerized legal research system. Describes how to formulate a search request so that all relevant cases are retrieved with as few irrelevant ones as possible.

McKenna, Brien, "How to Sell a Computer System to a Lawyer," [May-June 1983] 7 *CIPS Review* 20-22.

McKeough, J, "Computer Inc v Computer Edge Pty Ltd (1983) (Case Comment)," [1984] 7 *The University of New South Wales Law Journal* 161-172.

McKibbon, Wendy Lea, "Who Gets the Blame for Computer Crime?," [July 1983] 30 *Infosystems* 34-36.

Mednick, H, "Taming Technology," [1983] 7 *Canadian Lawyer* 24-30. Highlights items to consider when developing a long-range automation plan for a law office. Provides specific information about the following equipment and their respective vendors: photocopiers, copier controls and facsimile transmission equipment.

Mednick, Howard, "Computer Hardware," *Canadian Lawyer* [1983] 7 22-24. A user friendly explanation provided with respect to the equipment that comprises a computer system. Provides an installation checklist to assist purchasers in planning a computer installation.

Mednick, Howard, "The Computer Is Litigation Management's Biggest Gun," [1984] 8 *Canadian Lawyer* 31-32.

Mersich, Dan, "'So You've Got a New Idea, Eh'," [August 1983] 15 *Canadian*

Datasystems 37. Provides advice to software vendors as to how to protect computer programs from being misused/stolen by employees.

Mersich, Dan, "Coping with the Spectre of 'Agency Law'," [May 1983] 15 *Canadian Datasystems* 29. Discusses the law of agency as it relates to a situation whereby hardware and software vendors, although separate companies become so closely involved with each others' marketing activities that they would be merged into a single being for the purposes of determining liability under a contract.

Mersich, Dan, "Pirates Better Seek a New Line of Work," [December 1983] 15 *Canadian Datasystems* 21. Discusses a recent Ontario Court of Appeal decision which impacts on the software piracy question.

Mersich, Dan, "The Tax Man Cometh," [July 1983] 15 *Canadian Datasystems* 29. Discusses how revenue tax collectors are relying on an Income Tax Act reverse loophole (one which favours the tax collector as opposed to the taxpayer) to impose tax assessments on small businesses for back taxes associated with licensed software.

Mersich, Dan, "There's No Magic Answer about Privacy," [November 1983] 15 *Canadian Datasystems* 29.

Mersich, Dan, "Why Software Needs Realistic Tax Treatment," [March 1983] 15 *Canadian Datasystems* 37.

Mihm, Mickey T, "Software Piracy and the Personal Computer: Is the 1980 Software Copyright Act Effective?," [Summer 1983] 4 *Computer/Law Journal* 171-193.

Milgrim, Roger M, "Program Purloiners Doubly Deterred," [March 1983] 29 *Datamation* 158-163. Examines the pros and cons of legal protection afforded to software through the use of three different methods: Patent Act, Copyright Act and the court-made law of trade secrets. Argues that the best way to protect software is to copyright it and register it as a trade secret.

Millard, Christopher J, "Is Patent Protection Available for Programs?," [August 1984] 1 *Computer Law* 62-64.

Millard, Christopher J, "Legal Protection of Computer Programs and Data," Carswell Toronto [1985] 239 p.

Miller, Arthur Raphael, chairman and moderator, "Software Protection: The U.S. Copyright Office Speaks on the Computer/Copyright Interface," Law & Business/HBJ

New York, NY [1984] 482 p.

Miller, John, "A New Zealand CLIRS (Computerized Legal Information Retrieval Systems)," [September 1983] *The New Zealand Law Journal* 279-285. Comments on what is happening in the United States, Canada, Europe and the United Kingdom with respect to computer-assisted legal research (CALR) and provides an opinion as to what New Zealand should be doing in order to establish its own system.

Miller, John, "Expert Systems - The End of the Legal Profession?," [March 1984] *The New Zealand Law Journal* 85-88. Discusses the possible application to the legal field of two types of expert systems: The CAI System, which is based on the methods of computer-assisted instructions and the AI System, which involves the application of artificial intelligence. Provides negative predictions as to the implications of the fifth Generation Computer System on the legal profession.

Miller, Ralph Gano, "Creating an Estate Plan Database," [June 1985] 124 *Trusts & Estates* 46-50.

Millman, A, "Licensing Technology," [1983] 21 *Management Decision* 3-16.

Mills, Miriam K, "Containing Conflict: Teleconferencing and Labour Relations," [June 1983] 38 *The Arbitration Journal* 4-7.

Mills, Miriam K, "Luddites at the Terminal and Other Renegades: Computer Generated Conflict Areas," [1983] 10 *Rutgers Computer & Technology Law Journal* 115-126. Deals with the infiltration of computers into the work force and the resulting conflicts amongst labour, management, vendors, buyers and data conservers attempting to prevent data fraud. Discusses how society is dealing with these conflicts through the development of computer law, arbitration and cross-disciplinary collaboration. The computer itself is seen as a tool available to policy makers when analyzing and assessing a situation.

Milrad, LH, "Computers and the Law; Source Code and Escrow Agreements," [1984] 1 *Business and the Law* 18-20.

Milrad, LH, "The Times, They Are A-Changing in Office Technology," [1985] 9 *Canadian Lawyer* 27-30.

Milrad, Louis H, "A Guide to Data Bases Affording Quick Legal Searches," [September 1985] 9 *Canadian Lawyer* 36-37. An introduction to legal and non-legal databases which may be useful to lawyers. Provides specific information about the following non-legal databases: Dow Jones, Dialog, Infoglobe, The Source, iNet 2000 and NewsNet.

Myers, John, "Automated Law Research," [1983] 4 *Business Law Review* 157-158. Discusses a new research service available to the legal profession, bureau services which perform legal research on the various automated legal databases. The search profile (definition of the legal problem) is agreed upon by the solicitor requesting the search and the searcher. When the search is complete, the results are despatched to the enquirer and the client is later billed for the services.

Nussbaum, Jan L, "Apple Computer, Inc vs Franklin Computer Corporation (714 F 2d 1240) Puts the Byte Back Into Copyright Protection for Computer Programs," [Summer 1984] 14 *Golden Gate University Law Review* 281-308.

Nycum, Susan H, "Some Legal Aspects of Computer Security," [October 1984] 1 *Canadian Computer Law Reporter* 244-248.

O'Connell, LA, "Legal Malpractice: Does the Lawyer Have a Duty to Use Computerized Research?," [Fall 1984] 35 *Federation of Insurance Counsel Quarterly* 77-103. Examines legal and medical malpractice decisions in the USA to determine whether lawyers have a duty to use computerized legal research. Provides a comparison of computerized and manual legal research and a comparison of the Lexis System to the Westlaw System.

O'Connor, SL, "Profile: Computer Assisted Legal Research Service," [Winter 1984-85] 4 *Legal Reference Services Quarterly* 73-84. Operational profile of a phone-in computer-assisted legal research project funded by the Legal Services Corporation (LSC). Its mandate is to: 1) provide Westlaw and Lexis research to attorneys working on behalf of LSC clients located in ten states throughout the Southeast; and 2) participate in the development of a private, automated database of poverty-law oriented law. Provides analysis of usage patterns and user evaluations.

Onove, AJ, "Using Personal Computers in Tax Practice," [January 1984] 70 *American Bar Association Journal* 96-98. Provides advice to attorneys who are considering the purchase of software designed to handle tax-related computations (number crunching capabilities). Characterizes some of the basic features of a tax program and examines some of the specific software developed for the practice of law.

Onove, Allan J, "A Comparison of the Lexis and Westlaw Databases," [March-April 1983] 9 *Legal Economics* 27-40.

Paciaroni, Richard F, "Copyright Law - Computer Programs - The Ninth Circuit Court of Appeals Has Held That All Computer Programs are Copyrightable Regardless of Their Function. Apple Computer vs Formula," [Winter 1985] 23 *Duquesne Law Review* 457-475.

Palmer, John, "Copyright and Computer Data Bases," [1983] 14 *International Review of Industrial Property & Copyright Law* 190-213. Study illustrates that in Canada the present copyright protection available for databases is probably the optimal form of possible protection and that databases present no legal problems under the Canadian Copyright Act. From an economic point of view, the present definitions and legal practices provide the correct environment which encourages the creation of sociably valuable competitive databases. Suggests some changes to the Copyright Act.

Pantzer, Kurt F Jr, "Estate Practice in the Office of the Future," [Fall 1984] 19 *Real Property, Probate and Trust Journal* 721-735.

Parker, Donn B, "Computer Crime," [April 1984] 27 *Communications of the ACM* 313-315. Proposes an enlarged definition of 'computer crime' and calls for new federal legislation that will recognize information as a valuable asset. Provides insight as to present and future trends in computer crime.

Parker, Donn B, *Fighting Computer Crime,* Scribner New York, NY [1983] 352 p.

Parker, Margaret A, "Legal Software," [1983] 7 *Canadian Lawyer* 26-29. A user-friendly approach which provides basic information about computer software. Discusses the various law office functions that are candidates for computerization and what to look for in application software for each function. Provides a check list for software purchasers.

Parr, RJ, "Protection of Computer Software," [1984] 1 *Business and the Law* 4-6.

Pavluk, Jonathan, "Computer Software and Tax Policy," [December 1984] 84 *Columbia Law Review* 1922-2024. Describes the United States' Internal Revenue Service's position with respect to computer software and how the present federal tax policy structure should be reformulated so that tax incentives could be equitably applied to software transactions. At present these tax incentives require the application of the IRS' obsolescent standard of property classification, as tangible or intangible.

Pearson, Hilary E, *Computer Contracts: An International Guide to Agreements and Software Protection,* Financial Training London [1984] 298 p.

Peroff, Mark, "Selecting and Protecting a Trademark," [October 1983] 16 *Mini/Micro Systems* 319-321.

Perry, Tekla S, "Can Computer Crime Be Stopped?," [May 1984] 21 *IEEE Spectrum* 34-45.

Petricone, Lisa T, "Computer Software for the Legal Profession," [October 1983] 19 *Trial* 30-33. Provides a summary of software guides and interviews with software vendor personnel and is intended for use by litigators in the process of computerizing their firms for the first time. Strongly contends that buyers select the software before acquiring the hardware.

Petricone, LJ, "New Products," [nd] *Trial.* A column which regularily appears in the *Trial Journal.* Intended to provide up-to-date information to the litigator on office automation and the new technology.

Piatti, Marie-Christine, "La création artistique assistée par ordinateurs (In English, French and Spanish)," [1983] 118 *Revue Internationale du Droit d'Auteur* 109-167. The author looks at the legal problems in relation to artistic works created with the assistance of computers. Contends that no special status for computer-created work is required and that common-law solutions and copyright law should supply sufficient protection to the artistic creator.

Piragoff, Donald K, "Bill C-19: Reforming the Criminal Law: II. Computers," [1984] 16 *Ottawa Law Review* 306-315. Deals with those provisions in Bill C-19, a Bill to Reform the Criminal Law, that address aspects of computer-related criminality.

Porter Williams, Amy-Lynne, "Software Acquisitions: Acceptance Testing," [February 1984] 1 *Canadian Computer Law Reporter* 85-89.

Porter Williams, Amy-Lynne, "Tear-me-open Licences: Problems and Enforcement," [October 1985] 2 *Canadian Computer Law Reporter* 221-225. One of the major concerns to vendors of packaged software is the effectiveness and enforceability of the shrink-wrap or 'tear-me-open' licence agreements placed inside the cellophane covering of the diskette package. Until a Canadian or American court renders a decision dealing with this issue, the debate will continue as to whether these agreements comply with consumer protection law and as to the enforceability of the terms of these agreements.

Postell, Claudia J, "Computers in the Courtroom," [January 1985] 21 *Trial* 73. Examines the use of Computer-Aided Transcription (CAT) by court reporters. CAT is the state of the art insofar as the keeping of the record of court proceedings. It allows for fast transcript production, storage and retrieval of transcripts of proceedings and such other capabilities as keyword or key phrase indexing, courtroom administrative data input and real-time translation for the hearing impaired.

Roberts, RJ, "Protection of Semiconductor Chip Design Under Canadian Copyright Law: Will Canada Follow the Lead of the United States?," [1985] 23 *University of Western Ontario Law Review* 101-109. This paper considers whether Canada should follow the example set by the United States and pass legislation to protect the design of semiconductor chips. In addressing this issue, the writer examines existing Canadian law related to copyright protection of computer programs and makes a comparison with the laws in the United States. Provides views as to whether Canada should pass similar legislation.

Rodau, AG, "Protecting Computer Software: After Apple Computer, Inc v Franklin Computer Corp, 714 F 2d 1240 (3rd Circuit 1983), Does Copyright Provide the Best

Protection?," [Fall 1984] 57 *Temple Law Quarterly* 527-552.

Saxon, Charles, "Computer-Aided Drafting of Legal Documents," [1982] *American Bar Association Foundation Research Journal* 685-754.

Schachter, Esther Roditti, "Techniques for Litigation Avoidance in Contracting for Computer Systems," [1983] 10 *Rutgers Computer & Technology Law Journal* 109-113.

Schneider, J Stewart and Bowen, Charles E, *Microcomputers for Lawyers,* Tab Books Inc Blue Ridge Summit, PA [1983] 120 pp.

Schneider, Nancy, "Taking the 'Byte' out of Warranty Disclaimers," [Spring 1985] 5 *Computer/Law Journal* 531-555. Examines legal remedies available to purchasers of defective home computer programs and focuses upon the degree to which warranty disclaimers are valid and enforceable. Proposes changes needed to protect rights of the consumer.

Schwab, Wallace, "Droit, informatique et linguistique," [1983] 24 *Les Cahiers de droit* 237-252. Describes those areas in computer science and applied linguistics that have much to offer or represent obstacles to computerized legal research.

Scott, Michael D, "Commercial User-Vendor Litigation: The User's Point of View," [Winter 1985] 5 *Computer Law/Journal* 287-327.

Scott, Michael D, *Computer Law,* Wiley New York, NY [1984-] looseleaf. Identifies and analyzes the major legal issues faced by the computer industry. It covers software protection; computer contracts; the torts of negligence, fraud, privacy and antitrust; computer crime; constitutional issues such as freedom of speech and the press, search and seizure, and due process; evidence; and tax problems. An annotated bibliography and glossary are included.

Scott, Michael D, *Computer Law Reading List,* 2nd Law & Technology Press Los

Angeles, CA [1981] 39 p. Annotated bibliography evaluating selected periodicals and monographs in the computer law field. It is divided by subject, including contracts, crimes and security, evidence and litigation, privacy and the use of computers in the legal profession. Author and title indexes are included.

Scott, Michael D, *The Scott Report,* Law & Technology Press Los Angeles, CA [1981-] 1-. Monthly report on computer law topics, including contracts, labor law, patents, government regulation, privacy, computer crime and security. It deals mostly with US law, but developments in other jurisdictions such as the Far East and Europe provide an international perspective.

Seither, Michael, "Expert Witness," [September 24, 1984] 134 *Forbes* 202-203. Argues that computers in the courtroom may confuse jurors rather than remove all reasonable doubt in that the members of the jury will be asked to evaluate expert opinions founded on technology that is only dimly understood by most people. Questions the wisdom of using computers in the courtroom to present evidence, in particular in personal injury cases.

Shand, Barbara, "CAC Viewpoint on Computer Crime," [September 1983] 13 *Canadian Consumer* 49.

Shattuck, J, "In the Shadow of 1984: National Identification Systems, Computer-Matching, and Privacy in the United States," [July 1984] 35 *Hastings Law Journal* 991-1005.

Shattuck, John, "Computer Matching Is a Serious Threat to Individual Rights," [Sept-Oct 1984] 23 *AEDS Monitor* 9-11. A new investigative technique - computer matching - is being used more and more by government agencies. It involves the matching of unrelated computerized files with the aim of identifying law offenders. This article examines the legal issues of privacy, due process of the law and presumption of innocence with respect to computer matching. Addresses the questions related to cost effectiveness and the internal management of government programs.

Shepard's Citations, Inc and Soma, John T, *Computer Technology and the Legal Environment,* McGraw-Hill New York, NY [1984].

Shimeall, Warren G, "Strategic Planning for the Protection of U.S. Technology and Intellectual Property in the Trade Relationship Between the United States and Japan," [1983] 15 *Case Western Reserve Journal of International Law* 611-622.

Simits, Sprios, "Data Protection - Experiences and Tendencies," [1985] 18 *Law/Technology* 3-22.

Sizer, Richard and Newman, Philip, *Data Protection Act: A Practical Guide,* Gower Publishing Co. Aldershot, Hants, England [1984] 236 p.

Skelly, Stephen J, "Computer-Assisted Legal Research (CALR) - The Canadian Experience," [1984] 17 *Law/Technology* 3-25. Traces the development of computer-assisted legal research (CALR) in Canada and outlines the roles played by the various instrumental bodies. Discusses how market penetration for the existing CALR systems can be improved. Advocates that the successful marketing of these systems could make them more economically viable and lay the foundation for the more sophisticated systems of the future.

Soma, John T, *Computer Technology and the Law,* McGraw-Hill New York, NY [1983] 486 p. Introduces the major problems in computer law in the US, including software protection, antitrust, telecommunications regulation, privacy, computer crime, banking and electronic funds transfer (EFT), and import/export considerations. A glossary and bibliography are included.

Soma, John T, "Confidential Communications and Information in a Computer Era," [Summer 1984] 12 *Hofstra Law Review* 849-891.

Soma, John T, "The Communications Regulatory Environment in the 1980s," [Summer 1983] 4 *Computer/Law Journal* 1-54.

Soma, JT, "A Survey of Computerized Information for Lawyers: Lexis, Juris, Westlaw and Flite," [1983] 9 *Rutgers Computer & Technology Law Journal* 295-314. Examines four computer-assisted legal research (CALR) systems currently available: Lexis, Juris, Westlaw and Flite. Evaluates systems in terms of hardware, software, 'user-friendliness', cost-effectiveness, and liabilities. Discusses research problems best suited for CALR and provides suggestions as to what would constitute an ideal CALR system.

Speak, John Barlow, "Computers in the Private Sector: Right to Informational Privacy for the Consumer," [1982-1983] 22 *Washburn Law Journal* 469-490.

Spencer, Lee B Jr, "The Electronic Library: Impact on Professionals; How the Growing Use of Computers Is Affecting Disclosure under the Federal Securities Laws," [August 1983] 156 *Journal of Accountancy* 74-78.

Sprowl, James, "An Expert System for Drafting Legal Documents," [1984] 53 *National Computer Conference Proceedings* 667-673. Describes the ABF system and the ABF language for the IBM PC to be used in drafting legal documents. The system involves the integration of word processing and artificial intelligence techniques.

Sprowl, James A, "The Latest on Westlaw, Lexis and Dialog," [March 1984] 70 *American Bar Association Journal* 85-90. Comparison made between the Westlaw and Lexis legal retrieval systems and reveals recent developments relating to both systems. In particular, policy changes now allow users to access both systems with other than dedicated terminals. Describes Dialog, a Service of Dialog Information Services Inc, which is another library service useful to lawyers.

Steele, JT, "Computer-Produced Print-out: Reliable as Evidence?," [August 1983] 100 *South African Law Journal* 505-510. The Computer Evidence Act 57 of 1983 was passed and promulgated in the Republic of South Africa. The purpose of this act was to allow for the admissibility in civil proceedings of evidence generated by computers. The writer reveals the problems associated with the requirement that the computer printout evidence be accompanied by an authenticating affidavit if it is to be admissible under the new act.

Stokoe, Peter K, "The Potential of Computer-Communication Systems for the Delivery

of Legal Services," [1984] 7 *Canadian Community Law Journal* 26-43. Assesses the potential of recent efforts to improve the public's access to law and reduce the cost of legal services to the public through the use of computer-communication technology. In addressing this issue, the writer reviews other new approaches that are aimed at improving the public's access to the law and identifies those computer and communications technologies presently in use in the legal environment. Details prototype systems developed.

Stout, Donald E, "Protection of Programming in the Aftermath of Diamond v Diehr (101 St Ct 1048)," [Fall 1983] 4 *Computer/Law Journal* 207-242.

Stowe, Ronald F, "Regulating the Content of Computer Communications," [Sept-Oct 1984] 1 *Computer Law* 74-76.

Summers, A Kent, "Tax-Smart Ways to Acquire a Computer," [July 1984] 70 *American Bar Association Journal* 64-67.

Surrel, Carrol Ann, "The Treatment of Computer Software Works Made for Hire under the Copyright Act of 1976," [Spring 1985] 5 *Computer/Law Journal* 579-603.

Swartz, Herbert, "A New Generation of Computer Law," [November 1984] 3 *Business Computer Systems* 17-19. Examines the current legislation and jurisprudence related to copyrightability of computer programs.

Swartz, Herbert, "On-line Databases: The Legal Dilemma," [January 1985] 4 *Business Computer Systems* 28-29. Deals with the question of whether computerized databases are copyrightable. Examines the mess of court compilation cases (a database is a compilation) in which the copyrightability of the work is at issue. The mess derives from 'result-oriented' decisions whereby the court decides who should win and then provides the reasoning for its decision.

Syrowik, David R, "Disclosing Computer Programs in an Application for a United States Patent - A Trap for the Unwary," [Fall 1985] 26 *Jurimetrics Journal* 21-31.

Szibbo, Alec R, *Technology Transfer and the Canadian Business Enterprise: Current Laws and Evolving Policies Affecting Technology Transfer.* Materials organized by Alec R Szibbo. Dept. of Educ., LSUC Toronto [1984] looseleaf.

Tanford, Sarah, "Computer Modeling of Influence in the Jury: The Role of the Consistent Juror," [September 1983] 46 *Social Psychology Quarterly* 200-212.

Tapper, Colin, *Computer Law*, 3rd Longman London [1983] 242 p. Discusses computer law topics using developments in all common law jurisdictions including Canada, but particularly the UK and the US. Issues covered are the intellectual property concepts of patent, copyright, and trade secrets; computer contracts; computer torts; computer crime; privacy; and evidence. A select bibliography and index of concepts are provided.

Taylor, RW, "Computer Applications in Law Enforcement: Considerations in Planning," [March 1985] 52 *Police Chief* 56-60.

Thackeray, Gail, "Computer-Related Crimes," [Spring 1985] 25 *Jurimetrics Journal* 300-318.

Thomas, Paul, "Computer Retrieval - Drawing the Line?," [May 1984] 8 *Dalhousie Law Journal* 528-529. Discusses the necessity of placing certain limitations on the practice of citing unreported Court of Appeal Cases (England) which have now been included in a computerized database available to practitioners. These restrictions are required due to a proliferation of useless materials from computers in presentations before the court.

Thomson, Warren R, "Electronic Information in Trademark Practice," [1984] 74 *Trademark Reporter* 69-75.

Thunis, Xavier, "Les modes de protection juridique de logiciel (In English and French)," [1983] 9 *Droit et Pratique du Commerce international* 121-167.

Walshe, Willoughby Ann, "Legal and Financial Printers Race the Clock," [August 1983] 69 *American Bar Association Journal* 1087-1094.

Ware, Willis H, *Information Policy--Thoughts for the 80s,* Rand Santa Monica, CA [1982] 8 p.

Ware, Willis H, *Information Systems, Security, and Privacy,* Rand Corporation Santa Monica, CA [1983] 18 p.

Ware, Willis J, "Information Systems: Security and Privacy," [April 1984] 27 *Communications of the ACM* 315-321. Identifies what can, but is not, being done to ensure the security of information systems. Outlines action that the government could take to establish standards and provide leadership.

Warren, Raymond J, "Copyright: Computer Firmware: Is It Copyrightable?," [Winter 1983] 36 *Oklahoma Law Review* 119-135.

Warrick, Thomas S, "Legal Aspects of Purchasing Microcomputer Software," [August 1984] 10 *Bulletin of the American Society for Information Science* 9-12.

Wasserman, Michael G, "Section 174 and Computer Software Development," [August 1983] 61 *Taxes* 506-512. Deals with the question of the qualification of computer software development costs as 'research and experimental expenditures' within the meaning of section 174 of the Internal Revenue Code of 1954. Argues that the proposed regulation 1.174-2 appears to discriminate against computer software development costs, and in so doing, departs from existing law and legislative history.

Watt, David, commentator, "Computer Crime Under Bill C-18," [1985] Tape 2 *Criminal Law Audio Series* Part 2.

Webber, Chris, "Computer Crime: What Has Not Been Considered," [January 1985] 2 *Canadian Computer Law Reporter* 49-54.

Webber, Christopher, "Computer Crime or Jay-walking on the Electronic Highway," [March 1984] 26 *The Criminal Law Quarterly* 217-250. This article was written in anticipation of the Omnibus Bill, 1984 which contained amendments to the Criminal Code dealing with computer-related crime. Reveals arguments for restricting the enactment of any criminal provisions relating to computers until such time as a comprehensive study can be made.

Webber, Leigh C, instructor, "The Computer!: For Legal Assistants and Legal Secretaries: Materials Prepared for a Continuing Legal Education Seminar for Legal Assistants and Legal Secretaries Held in Vancouver, BC," CLES of BC Vancouver, BC [1983] various.

Wedge, David, "Custom Development of Software: An Overview," [February 1984] 1 *Canadian Computer Law Reporter* 89-92. Discusses the essential contents of a custom development agreement pursuant to which a software developer undertakes to design, program and implement a computer system to fulfill a user's needs.

Wedge, David, "The Acquisition of Packaged Software: An Overview," [January 1984] 1 *Canadian Computer Law Reporter* 39-42.

Wedge, David J, "Application of Sale of Goods Legislation to Computer Acquisitions," [April 1986] 1 *Canadian Computer Law Reporter* 124-130.

Wedge, David J, "British Columbia: Recent Amendments to Provincial Sales Tax," [October 1985] 2 *Canadian Computer Law Reporter* 230-231. Deals with a recent amendment to the Social Service Tax Act which as a result of the amendment now includes computer software as tangible personal property. Examines the issue of whether computer software is subject to provincial sales tax.

Wedge, David J, "Computer Contracts: A Holistic Approach," [November 1983] 1 *Canadian Computer Law Reporter* 8-10.

Wedge, David J, "Computer Hardware Purchase Agreements," [December 1983] 1 *Canadian Computer Law Reporter* 28-33.

Wedge, David J, "Software Licences: The Neglected Terms," [June 1984] 1 *Canadian Computer Law Reporter* 164-166.

Weir, Sean, "Acquiring a Software Business," [November 1983] 1 *Canadian Computer Law Reporter* 11-13.

Westin, Alan F, "New Issues of Computer Privacy in the Eighties," [Mar-Apr 1984] 22 *AEDS Monitor* 10-14,30.

Wharton, Leslie, "Legislative Issues in Computer Crime," [Winter 1984] 21 *Harvard Journal on Legislation* 239-254. Analyzes major provisions most commonly found in computer crime statutes and highlights conceptual problems peculiar to the computer and computer crime legislation. Focuses on problems related to drafting laws criminalizing the use of the computer to commit fraud or embezzlement and in extending the definition of property for the purpose of larceny to include a computer's electrical impulses.

Wharton, Leslie, "Use and Expression: The Scope of Copyright Protection for Computer Programs," [Spring 1985] 5 *Computer/Law Journal* 433-468.

Wheeler, Laura, "Trade Secrets and the Skilled Employee in the Computer Industry," [1983] 61 *Washington University Law Quarterly* 823-847.
